

Play Group Assessment Handbook

How the class teacher records grades and observations, how the office turns them into report cards, and what still has to happen before a parent can see one.

No report card is visible to parents yet — for any class

The parent lookup page is switched on and working, but no report card has been generated or released anywhere in the school. A parent searching today gets *“No released report card found.”* That is true for Play Group and equally true for LKG through Class X.

```
report_cards: 0 documents • marks (Class III-X): 0 documents • Class III-X
lookup switch: off
```

FOR THE CLASS TEACHER

Recording Play Group assessment

Two screens. Grades on one, everything written on the other. Both live in the Assessment App.

`st-francis-school-a3e7e.web.app / assessment-app` → sign in

1 Enter the eleven activity grades

Open the **Co-Scholastic** tab, choose **Play Group** and the term. The activities appear in the same order as the register, so you can read straight down the page you already wrote.

Use **Quick entry** — it shows one activity at a time with every child listed, so each grade is a single tap instead of opening a dropdown.

2 Write the growth observations

Open the **Observations** tab. Pick a child from the strip at the top — a filled dot means something is already written for that child, an empty circle means nothing is.

There are five rows. What each row is about is your choice; the headings “Observation 1–5” are only there to tell them apart and are never printed. Fill each row across the three columns as the year goes on: at the start, at half yearly, and at term end. Leave a column blank until you have actually observed it.

3 Enter attendance by hand

On the same **Observations** screen, below the observations. **Working Days** is one number for the whole class; **Days Present** is for the child on screen. The percentage calculates itself and turns red below 75%.

Changing Working Days changes it for every child in the class — that is deliberate, since it is the same school term for all of them.

4 Write one remark per term

A short paragraph under each term, in your own words. The Final Term remark is also where the promotion line goes, for example *Promoted to Class — LKG*.

5 Save

Saving stores every child in the class, not only the one on screen. You can move between children freely and save once at the end.

If a child was absent, choose **NA** rather than leaving the cell blank. Blank means “not graded yet”; NA means “absent or not assessed” and prints as a dash with that meaning in the key.

REFERENCE

Play Group grade scale

Play Group is the only class that uses **C+**. Entry shows percentage bands; parents see the words below.

O Outstanding

A+ Excellent

A Very Good

B+ Good

B Satisfactory

C+ Needs Improvement

C Needs Much Improvement

NA Not Assessed / Absent

FOR THE OFFICE

Viewing, generating and releasing

Nothing reaches a parent until it is generated, marked ready, and released — three separate deliberate steps.

1 Check what the teacher has entered

Assessment App → **Admin** → **Co-Scholastic Locks** shows which class and term has grades in it. Lock a class there once you are satisfied, and the teacher can no longer change it.

2 Generate the cards

Assessment App → **Admin** → **Report Cards**. Choose **Play Group** and the term, then generate. This builds a draft card per child from the grades, observations, remark and attendance.

3 Review, mark ready, release

The release panel on the main portal lists every card with its fee status. Read a card before releasing it — generation does not check that anything is actually filled in.

Main portal → Report Cards → filter: Play Group → Mark Ready → Release

4 Tell parents where to look

Parents open the lookup page and find their child — no login needed. Only released cards appear.

CURRENT STATE

What is done and what is missing

Play Group, First Half-Yearly, as things stand right now.

ITEM	STATE	WHAT IT NEEDS
Ten activity grades	Entered	Transcribed from the register for all six children
Discipline	Blank	Could not be read from the register photo — teacher to fill in
Growth observations	Blank	Teacher to write, five rows per child
Attendance	Blank	Empty in the register too — teacher to enter days present
Term remarks	Blank	One short paragraph per term, per child
Generated cards	None	Generate once the rows above are filled
Released to parents	None	No class in the school has a released card yet

One thing worth settling first. The register these grades came from is dated 13–15 July, but the system treats First Half-Yearly as February to June. The grades sit in the right place; only the date range printed on the card will disagree with the register. Decide whether that matters before releasing anything.

Play Group is the only class assessed this way — eleven activities, hand-typed observations, and hand-entered attendance. Every other class is graded through fortnightly assessment sessions instead.
